

DOES THIS SOUND LIKE YOU?

- Have you seen numerous doctors or practitioners without significant results?
- Have you been told there is nothing that can be done to help your symptoms?
- Do you have a brain-based condition that seriously impacts or limits your activities and overall happiness?
- Have enjoyment and optimism for your life diminished because of your chronic health issues?
- Are you an athlete looking to improve your overall performance?
- Do you suffer from repetitive sports injuries and/or chronic pain and limitations on activity?
- Are you suffering from post-concussive symptoms that seem to never improve or go away?

WE CAN HELP

Patients at MFNC have described and demonstrated significant, even dramatic, improvement in a wide range of health conditions and symptoms under our care:

- balance disorders
- arm/shoulder pain
- low back pain/sciatica
- bulging/herniated discs
- carpal tunnel syndrome
- dizziness
- dystonia
- early Alzheimer's symptoms
- fibromyalgia
- RLS (restless leg syndrome)
- headaches
- migraines
- insomnia
- hip/knee/feet pain
- tremor disorders
- MS symptoms
- Parkinson's
- neck pain
- numbness
- spinal stenosis
- low immunity

We have the resources and experience to comprehensively assess your most frustrating and persistent health issues. We employ a functional neurology approach and cutting-edge therapies, equipment and treatment modalities to diagnose and support you. And, we have the expertise to incorporate neuroscience straight from the research laboratory into the direct application of managing your care.

YOUR BRAIN IS AT THE HEART OF EVERYTHING WE DO

THE MFNC APPROACH

Brain health is integral and foundational to every area of your physical and emotional well-being. It's simple science: The brain controls your body, and your body provides feedback to your brain. When this relationship breaks down, so will your health.

By identifying the underlying neurological issues at the source of your physical condition, we can address and help you manage your health in new and powerful ways. Without evaluating ways in which the brain and body are communicating—or rather, not communicating—it is impossible to make significant progress.

Office evaluations and cutting-edge lab testing are employed to assess the function of the brain, nervous and immune systems. Harnessing comprehensive training, specialized expertise and cutting-edge lab testing, diagnostic equipment and therapies, we examine how brain function interacts with other systems in the body. This unique perspective enables us to understand and effectively manage a wide variety of complex health conditions. This uniquely thorough approach is offered by very few clinics around the world.

ABOUT FUNCTIONAL NEUROLOGY & CHIROPRACTIC

Functional Neurology is on the cutting edge of healthcare. At Minnesota Functional Neurology & Chiropractic, we enhance the very best of the physical medicine of Chiropractic Care with high-level specialization in Functional Neurology, Endocrinology and Immunology.

WHAT MAKES MFNC DIFFERENT?

HOLISTIC, THOROUGH APPROACH

The initial examination and subsequent care provided by MFNC are very thorough. We have found this to be the key to unlocking permanent and lasting doors on the road to recovery. At MFNC, understanding the brain-body connection is foundational to our approach to care. The team at MFNC is invested in helping their patients to achieve a greater quality of life.

SPECIALIZED TRAINING AND EXPERIENCE

Dr. Jeremy Schmoe is thoroughly-trained to diagnose and treat complex brain injuries. Having received his certification from the Carrick Institute for Graduate Studies, Dr. Schmoe also lectures nationally and internationally on Functional Neurology and Concussion management for them. This ensures that Dr. Schmoe and his team are always on the forefront of the field's progress, up-to-date with the most current research and aware of the latest therapies available for traumatic brain injury and concussion.

COMPREHENSIVE EVALUATION PROCESS AND DIAGNOSTIC TOOLS

A comprehensive evaluation process is conducted with all new clients. The complete neurological examination is the basis for determining the root cause of your condition and provides the foundation for your treatment. By not simply treating the symptoms, but rather targeting the cause of the symptoms, you will notice measurable improvements.

CUTTING-EDGE TOOLS AND THERAPIES

Minnesota Functional Neurology and Chiropractic utilizes a wide variety of cutting edge therapies during treatment. We will provide non-invasive therapies specifically selected for you, and we understand how to monitor changes in your function.

EXPERIENCED IN MANAGING COMPLEX CASES

Our team is very familiar with managing complex cases. We specialize in providing care to patients who have come to MFNC reporting that they have been everywhere and tried everything, yet are still plagued with symptoms. Patients from all over the country seek help from Dr. Schmoe and his team because they are able to provide the type of care that restores hope, helping patients get back to doing the things they love to do.

CLIENT SUCCESS STORIES

Concussion, Post-Concussive Syndrome and Traumatic Brain Injury

Dr. Schmoe and his staff are absolutely extraordinary. I had been having some strange neurological symptoms following a car accident for well over a year and had been to multiple doctors in a fight to figure out exactly what was going on. It wasn't until I found Dr. Jeremy that I finally found both answers and relief. Dr. Jeremy informed me that I had been experiencing chronic concussion symptoms. Within a couple of months of treatment my symptoms had nearly vanished. Even though I had been living a healthy lifestyle, functional neurology was the missing piece of the puzzle for me. Dr. Jeremy is a truly brilliant practitioner and I am proud to call him a colleague of mine. M.B- DC Doctor of Chiropractic – Mitch B.

Functional Neurology Orthopedic Rehabilitation (FNOR), Athletic Injuries and Chronic Pain

Dr. Schmoe has an overwhelming passion to help people overcome any challenging problems they might have presented to them, and I continue to be impressed with his knowledge and the high quality of care he offers his patients. His knowledge and skills in dealing with the nervous system, including how nutrition and stress relates to it, is second to none. I would recommend him to anyone who is seeking the very best in the field of functional neurology. – Cal Dietz, Head Strength and Conditioning Coach University of Minnesota

Complex and/or Chronic, Metabolic, Neurological and Auto-Immune Conditions

I started with Dr Schmoe towards the end of February and I came to him with the goal of healing up the rest of my neurological issues from Chronic Lyme and a bio toxin illness. Double vision and dizziness also was so bad for years. Also horrible pain in my back, neck and hips. When I would do yoga I would get so motion sick I'd vomit or be laid up for awhile. He suggested give this Auto Immune Protocol (AIP) (repairvite diet) a try for 7 days, thought "How could I go without my coffee, cream, bread, Doritos etc...." 7 days went by I lost 5lbs and had some renewed hope that I could lose weight too. Then he challenged me to do another 7 days. "Do not cheat." I didn't cheat, kept going and going and within 20 days I was down 19 lbs, sleeping great, able to workout and do my brain exercises with no troubles. I'm currently down 38lbs since Feb 19th and I wouldn't trade this for all the Doritos in the world! My hubby was so inspired by my success that he started and is down 58lbs. We are thrilled and so grateful for Dr. Schmoe. We are now encouraging our folks at The Well in Dassel to try Paleo! Nails the inflammatory process one bite at a time! Thanks from our crew to yours! – Dawn G.
